**Dear Colleague!**

On the basis of the decision of the Doctoral School of Faculty of Economics of the University of Miskolc, I hereby invite you to the formal evaluation of the PhD thesis of Mazen Bustanji entitled "The efficiency of capital market of Jordan an empirical investigation of the efficient market hypothesis: the case of the Amman Stock exchange".

Please note that our Doctoral School considers the main scientific merits of the theses to be:

- original research questions on recent topic selection
- results that are justified by the use of modern research apparatus (appropriate database, statistical and other methods, verbal and formal exposition),
- which provide a picture of the real economy's operation
- which give new or novel economic knowledge.

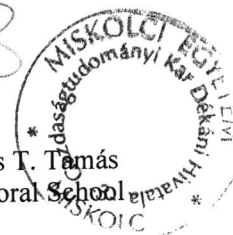

In your review, please also state which of the candidate's theses you accept as new or novel results.

Please return your written comments in 2 hard copies to our address by **1 September 2022**.  
The public debate will take place in Miskolc at a time agreed with you in advance.

Thank you for your assistance.

With kind regards:

  
Prof. Dr. Sikos T. Tamás  
Head of the Doctoral School
